

We need to keep the FM translator service and the LPFM service as they are with NO changes. The K-LOVE radio station uses FM translators to reach millions of listeners. I listen almost every waking hour. If I was unable to listen, it would be quite upsetting. K-Love plays such positive and encouraging stories and music. It is very soothing and can reduce your stress level. They also give local events, advertising them for free, which we would not be able to do on other stations. K-Love is listener supported--that means there are plenty of listeners who want to keep that station there just as it is, because if not, K-Love wouldn't be on the air. With all the stations on today it should be our choice what we want to listen to. That means we need K-Love to continue as is on the FM translators. It is such a valuable thing to be able to turn on my radio and not worry about what kind of crap they are playing or talking about (sex, drugs, violence) when I have my child or other people's children riding in the car with me. They are hearing things they need to hear, and not the trash that other stations play. Please do not change anything!
